

Project Manager / Engineer

Location: Mumbai _Andheri East

Experience: 8+ years

Industry: System Integration / IT Hardware Solutions / Audio-Visual / Networking

Employment Type: Full-time

Job Summary:

We are seeking an experienced Project Manager / Engineer to lead and execute hardware-based system integration projects, ensuring timely delivery, technical excellence, and client satisfaction. The ideal candidate will have a strong background in project management, engineering design, and implementation of IT hardware solutions, including audio-visual systems, networking infrastructure, video conferencing, and workstation deployments.

Key Responsibilities:

Project Management & Execution

- Plan, execute, and oversee end-to-end system integration projects for hardware solutions.
- Define project scope, objectives, timelines, and deliverables in collaboration with stakeholders.
- Develop and track project budgets, schedules, and risk management plans.
- Ensure compliance with industry standards, security policies, and best practices.

Technical Engineering & Solution Deployment

- Lead the design, configuration, and deployment of integrated hardware solutions, including audio-visual systems, networking, workstations, laptops, and video conferencing.
- Provide technical expertise in networking infrastructure, unified communications, server hardware, and collaboration tools.
- Work with cross-functional teams to ensure seamless integration and interoperability of hardware and software.
- Troubleshoot and resolve technical issues during project execution.

Client & Stakeholder Management

- Act as the primary point of contact for clients, ensuring effective communication and relationship management.
- Conduct technical presentations, requirement analysis, and solution discussions with customers.
- Collaborate with vendors, subcontractors, and internal teams to ensure successful project delivery.

Compliance & Documentation

- Ensure adherence to International Organization for Standardization (ISO), ITIL, Project Management Institute (PMI), or other relevant project management methodologies.
- Maintain detailed documentation, including project reports, test plans, risk assessments, and handover documents.
- Support compliance with regulatory requirements and cybersecurity best practices.

Team Leadership & Training

- Mentor and guide junior engineers and project teams.
- Provide training and knowledge transfer to clients and internal teams.

Qualifications & Skills:

- 8+ years of experience in hardware system integration, IT infrastructure, audio-visual solutions, or networking projects.
- Bachelor's degree in Engineering, Computer Science, IT, or a related field (Master's degree is a plus).
- Strong knowledge of project management methodologies (PMP, PRINCE2, Agile, or similar).
- Hands-on experience with networking hardware, video conferencing solutions, digital signage, AV control systems, and workstation deployments.
- Proficiency in tools like AutoCAD, MS Project, Primavera, or other engineering and project management software.
- Excellent problem-solving, communication, and leadership skills.
- Ability to work in a fast-paced environment and manage multiple projects simultaneously.

Preferred Qualifications:

- Certifications such as Project Management Professional (PMP), Information Technology Infrastructure Library (ITIL), Cisco Certified Network Associate (CCNA), Certified Technology Specialist(CTS), or vendor-specific AV and networking certifications.
- Experience with Cisco, Crestron, Poly, Microsoft Teams Rooms, Zoom Rooms, or similar hardware solutions.
